

GROUND COVER

ANTI-VEGETATION TARP FOR SUBSTRATES

PERMEABLE

The anti-vegetation tarp prevents the growth of grasses and roots, protecting the patio substructure from the ground. Permeable to water, allowing it to flow off.

STRONG

The polypropylene non-woven fabric (50 g/m²) effectively separates the patio substructure from the ground. Dimensions optimised for patios (1,6 m x 10 m).

NAG

LEVELING PAD

OVERLAPPABLE

Available in 3 thicknesses (2,0, 3,0 and 5,0 mm), can also be overlapped to obtain different thicknesses and thus effectively level the patio substructure.

DURABILITY

The EPDM material guarantees excellent durability, is not subject to sagging in time and does not suffer from exposure to sunlight.
